EXCEL PORTFOLIO PROJECT

Olist E-Commerce Sales & Delivery Analysis

Does high order volume really mean higher profit?

Excel | Formulas | Dashboard

By Jagruti | Data Analyst

The Goal

- Study **sales by state** and **monthly trends**
- Measure **delivery performance** and find bottlenecks
- Check if **busy markets are actually profitable**

> **Data:** 2,000-order sample with the Olist Brazilian e-commerce structure. All results are live Excel formulas and recalculate on the full dataset.

Project at a Glance

2,000
Orders

19.2%
Profit margin

12.4
Avg delivery days

92.8%
On-time deliveries

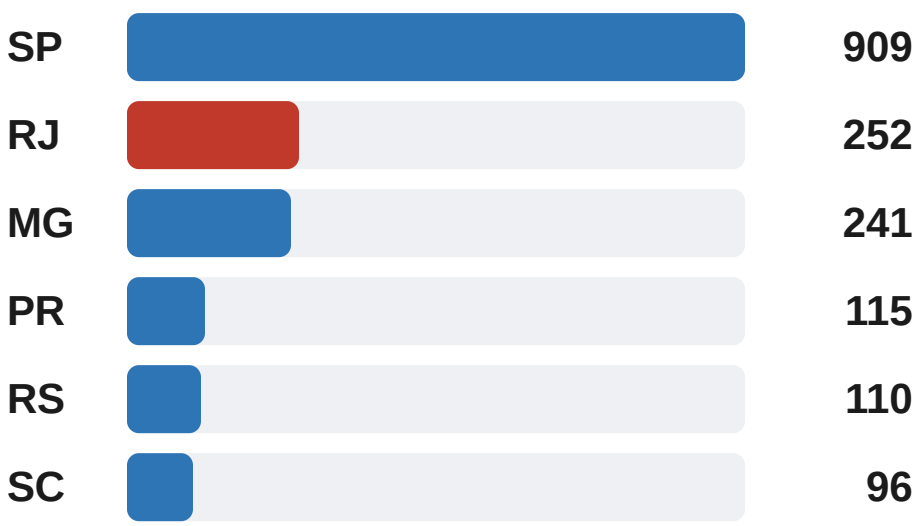

4.21
Avg review score

12
States analysed

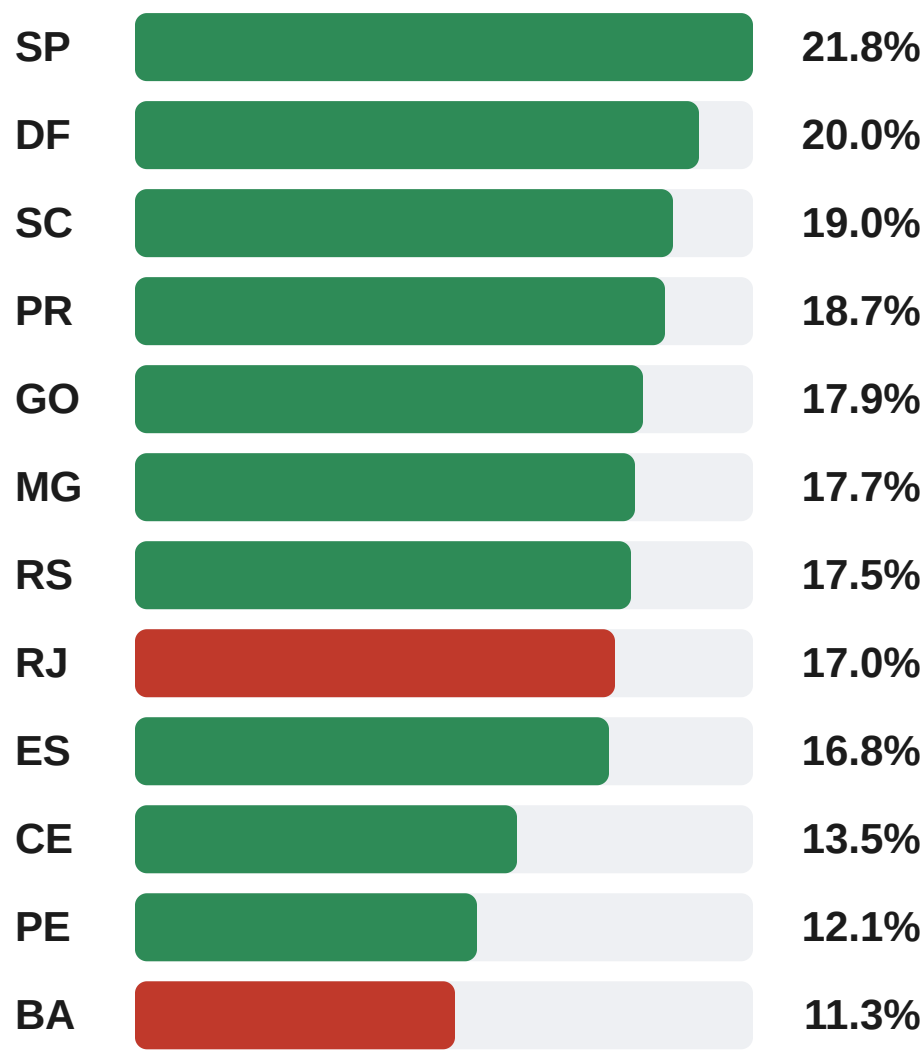

Profit = price - cost of goods (assumed per category) - absorbed freight (assumed %). Both are editable inputs.

Finding 1: Volume ≠ Profit

Orders (top 6)

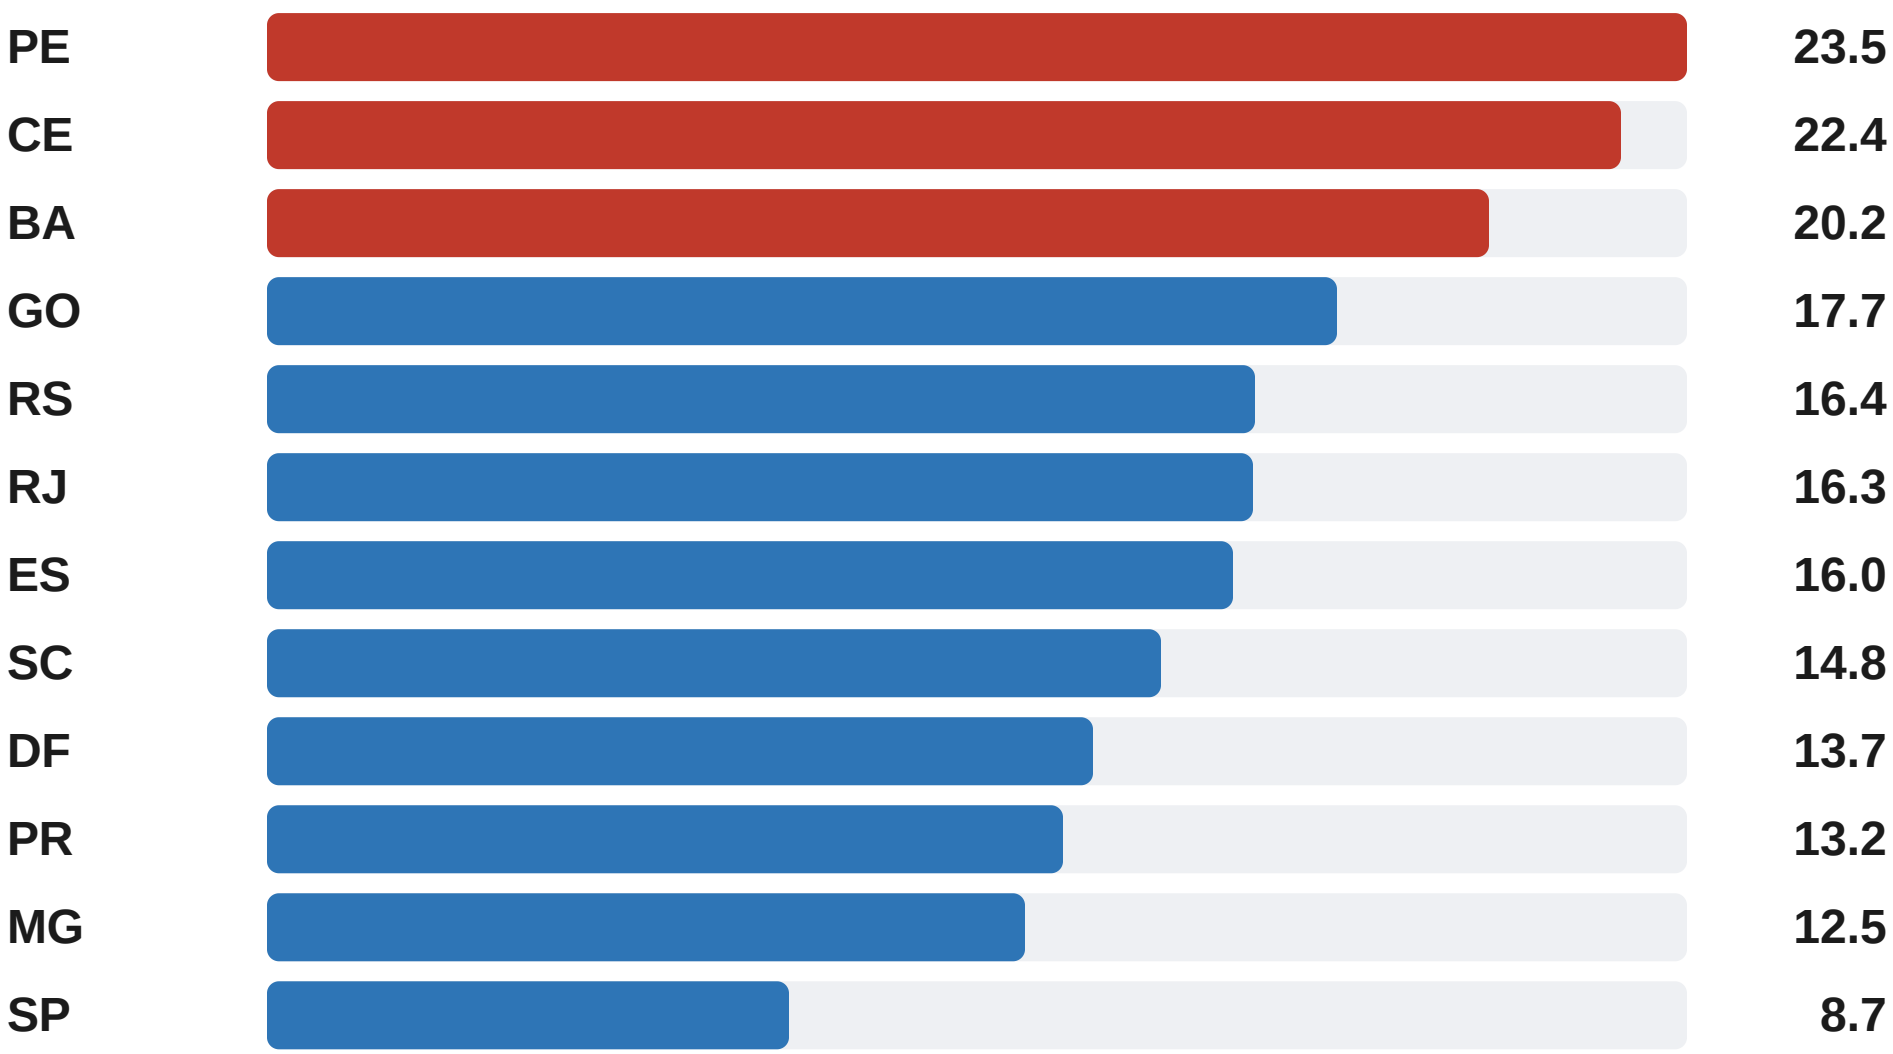

Profit margin (all 12, ranked)

1. RJ is a top-4 state by orders (12.6% of volume) yet ranks #8 of 12 on margin (17.0% vs 21.8% for SP) - high order volume does not mean higher profit.

Finding 2: Delivery Bottlenecks

Average delivery days by state (slowest first)

> 3. PE is the likely delivery bottleneck: 23.5 avg days vs 12.5 overall, with 90.5% on-time.

Finding 3: Late = Unhappy

Avg review score by delivery time

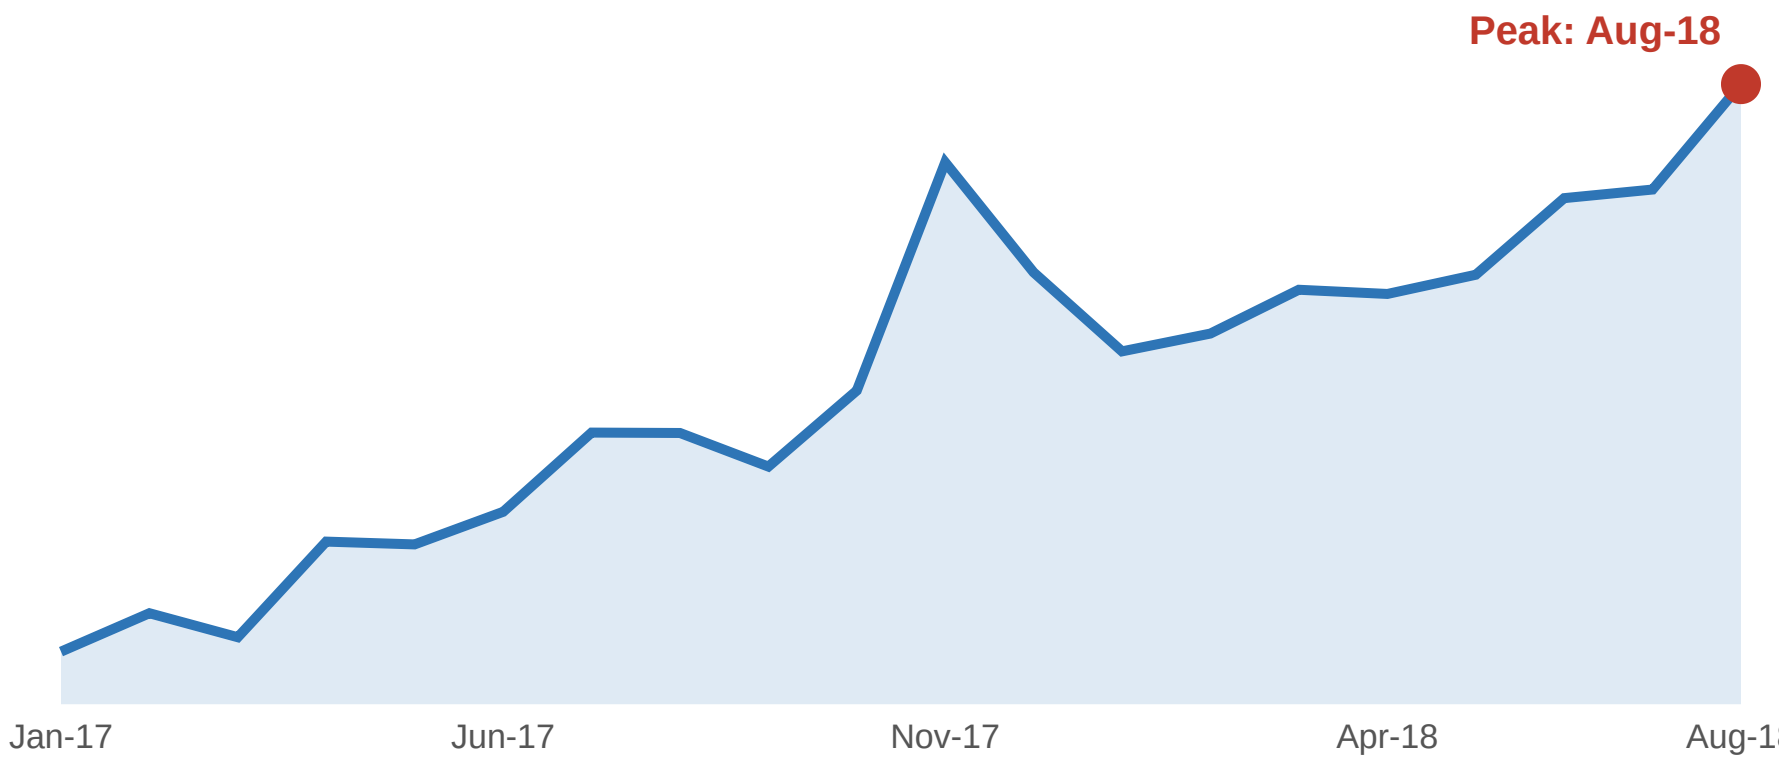

4.34
review score, on-time orders

2.66
review score, late orders

Late orders run 4.9 days past the estimate on average.

Monthly Sales Trend

Monthly revenue, Jan-17 to Aug-18

- Steady growth month over month
- Peak month flagged automatically with MAX/INDEX/MATCH
- Includes MoM growth, 3-month moving average, cumulative revenue

Excel Skills Used

SUMIFS | COUNTIFS | AVERAGEIFS | INDEX / MATCH | RANK | SUMPRODUCT | EDATE | IFERROR | Nested IF | Data Validation | Conditional Formatting | Charts

6 sheets: Dashboard, Data, Assumptions, State, Monthly and Delivery analysis, Category analysis. Over 18,000 formulas, zero errors, a state drill-down dropdown and insights that rewrite themselves.

- The busiest market is not always the most profitable one
- Freight cost and slow delivery quietly eat margin
- Late deliveries cost about 1.7 review points
